Bona®

Bona Retarder

Bona Retarder is an additive that improves the levelling and prolongs the open time of Bona waterborne finishes, both primers and top coats. It is designed to be used when the indoor humidity is low and/or the temperature of the room is higher than normal. Using Bona Retarder will reduce the risk of the finish drying too quickly and leaving roller marks in the dried coat.

Key Benefits

- Facilitates application in dry and/or warm climatic conditions
- Prolongs the open time
- Minimizes the risk of overlapping and discolouration

Technical Data

Mixing ratio:	Maximum 4% Bona Retarder
Safety:	Unclassified
Flash point:	Non-flammable
Shelf life:	At least 2 years, from the date of production, in unopened original container
Storage/transport:	The temperature must not fall below +5°C or exceed +25°C during storage and transport
Pack size:	12 x 200 ml (120 boxes per pallet)
